

16. The Grand Lake Traffic Calming and Pedestrian Safety Committee heavily influenced the Splash Pad and Lakeshore Complete Streets projects but is currently inactive. We'd like to resurrect the group as an incubator for traffic and pedestrian improvements in the Grand Lake commercial district. If you're possibly interested, please provide your name and email address.

We were totally blown away by the overwhelming response to this question. 101 individuals responded with their contact information. By crosschecking names with responses to Question 3, we're pretty sure this list includes neighbors who support the Grand Avenue "road diet", as well as those who are opposed or currently undecided.

The discussion about the pros and cons of this project has already begun with the responses posted to Question 4 and a smaller number of comments posted to THIS LINK on Question 17. In addition, these issues are almost certain to be the first priority of the Grand Lake Traffic Calming and Pedestrian Safety Committee.

If you're one of the 101 neighbors who signed up, please expect a follow-up survey in your email in the next ten days or so. If it doesn't arrive or you wish to be added to this list please send an email to: TrafficCalming@grandlakeneighbors.org.
